

RUSLAN GAINANOV

Age: 26

Phone: +7 (978) 956-01-70

Email: gromrx1@gmail.com

Website: gainanov.pro

Job objective: Software developer, system engineer, DevOps, analyst

Education	Professional Experience
<ul style="list-style-type: none">➤ 2015-2017: Magister of DISTIBUTED COMPUTER-AIDED SYSTEMS in Perm National Research Polytechnic University (PNRPU)➤ 2011-2015: Bachelor of COMPUTING MACHINES, SYSTEMS AND NETWORKS in Perm National Research Polytechnic University (PNRPU)➤ 2007- 2011: Specialist of MAINTENANCE OF COMPUTER AND COMPUTER NETWORKS in Perm Aviation technical school named Shvetsov A.D.	<ul style="list-style-type: none">➤ 2018 – DevOps in NAS Company (Perm): Deploy web-services in Docker cloud. Create CI/CD process with GitLab. Administrate Linux and FreeBSD servers. Configure system for database managment and backups.➤ 2017 – CIO in I-ON Company (Perm): Design a service for gather metrics from IoT-devices. Configure system for analyzing and visualization data.➤ 2017 – Student (magister) in Perm National Research Polytechnic University (Perm): Design a computer model for my scientific work that simulate robot motion and find path without collision with obstacles.➤ 2016 – Developer in Institute of Continuous Media Mechanics UB RAS (Perm): Design and deploy a system for collect, store and visualize data from SLURM compute cluster realized on Docker environment.➤ 2016 – IT trainee in Joint Institute for Nuclear Research (Dubna): Design a system to gather and view statistics of the cloud resources utilization with OpenNebula, InfluxDB and Grafana.➤ 2015 – Developer in PJSC Rostelecom (St.Petersburg): Developpe a program for parsing address in any format and searching it in the database (C++/Qt).➤ 2015 – Student (bachelor) in Perm National Research Polytechnic University (Perm): Design a remote controller to wireless manupulate a crane. Developpe an Android app and transport data protocol. Write a programm for ARM microcontroller.➤ 2014 – Developer in Nordavind LLC (Dubna): Development of a program works with heart signals and for drawing an ECG and calculate some parameters.

Skills & Experiences:

- able to work in a team, communicate with customers, to prove my point of view on technical matters, to search for information on necessary matters,
- knowledge of PC architecture, networking, server administration (Linux/BSD), DevOps technologies and CI/CD software,
- knowledge of writing queries for relational databases (MySQL, PostresSQL, SQLite) and NoSQL (ElasticSearch, InfluxDB),
- know computer languages and software in
 - basic level: C, C#, Java, PHP, HTML, JS, CSS, Lua,
 - advanced: C++/Qt, Python, git, bash/shell
- have work with web-frameworks like React,
- knowledge of element base, reading assembly and schematic schemes of electronic devices,
- have experience with embedded-systems (based on Arduino, ARM), electronics and soldering of radioelements,
- have experience of design UML models, analyze complex systems and explain it to the human in a nutshell,
- understanding Agile and Scrum.
